Track 4A is a new power plant located in Pasir Gudang, Johor that's expected to achieve scheduled commercial operation on 1st July 2020. We have completed three shipments thus far and at the moment, we are delivering the fourth batch of items, all of which are structures that have varying dimensions and weights. There is a lot more shipments for this project and we expect to complete by the third quarter of 2019.

Transporting Parts of Tunnel Boring Machines

Tunnel Boring Machines (TBM) are required in the construction of underground railway stations for a railway project in Klang Valley. We have been moving these heavy parts such as the TBM's front shield, middle shield and tail skin to specific underground stations.

Cargo: Ballast Wagons (15 units)
Dimension: L12.20 m x W2.76 m x H3.03 m
Weight: About 20 ton each

15 units of Ballast Wagons from China for Malaysia's National Rail Company

Transporting Tamping Machines for Rehabilitation Purposes

Cargo: Tamping Machine (2 units)
Dimension: L21.40 m x W2.70 m x H3.75 m
Weight: 63 ton each

This is one of our recently completed jobs where we loaded a total of 37 packages including oversized structures and crated goods onto a 250-ft barge in Port Klang. The barge, to be sailed to Indonesia, carried various cargoes, namely stripper columns, flash drums and platforms. The heaviest cargo was a Separation Column weighing 65 ton with a measurement of L30.55 m x W4.45 m x H4.95 m.

Cargo: Rotor
Dimension: L10.25 m x W1.20 m x H1.20 m
Weight: 41.50 ton
Scope: Transportation and lifting

Delivering Girders to be Exported to Kuwait

Cargo: Girder (8 units)
Dimension: Between 20 - 30 m in length
Various weight

Fire Extinguisher Training for Office Staff at Megalift HQ, Port Klang conducted by Safety Manager

Key Performance Indicator (KPI) and Appraisal Training for the organisation's middle management team

In line with our *Development* core value of "developing leaders at all levels", we actively organise and conduct leadership training for our middle management team and potential individuals.

We believe both technical knowledge and soft skills are crucial for an employee to develop as part of their career advancement prospect.

Towards Excellent Leadership Communication training for potential leaders
