Cargo: Offshore Structure
Dimension: L14.80 m x W10.60 m x H5.60 m
Weight: 57.80 ton

We transported another two batches of offshore cargoes in Port Klang to be exported to East Malaysia. All of them are structures that will be assembled for an offshore oil and gas operation. There are 7 units in total varying from 30 ton to the heaviest of 163 ton. The first shipment involved loading them onto a barge using a heavy duty crane while the second shipment, the structures were sent via a vessel.

Transport in Port Klang
Cargo: Skid (3 units)
Dimension: L13.00 m x W9.30 m x H3.66 m
Weight: 66 ton each

Double banking in Port Klang - Barge alongside
Mother Vessel for direct discharge
Cargo: Generator Stator
Dimension: L11.40 m x W5.10 m x H5.20 m
Weight: 440 ton

We've been performing a series of skidding procedures to move in and position transformers at various railway sites for an ongoing project.

Cargo: Transformer
Dimension: L6.30 m x W2.45 m x H3.15 m
Weight: 47 ton

Cargo: Rails (2963 pieces)
Dimension: L25 m each
Weight: 4000 ton (total)
