Malaysia is no foreign to international players when it comes to fabrication assembly and engineering works. Our high level of technical expertise in producing industrial equipment is sought after by other countries. As such, you often see us exporting fabricated structures, tanks and skids for various industries. And therefore, you see Megalift coming into picture because most of the equipment is oversized.

Recently we worked with our client in the transport of a Produced Water Treatment (PWT) Skid in Port Klang. After months of preparation, the Skid was ready to be shipped out from Port Klang to South Korea.

The skid stands at a height of 11 meters, certainly moving it even for a short distance is no easy feat. Thanks to our team for the good work and for always putting safety before anything else.

Cargo: PWT Skid
 Dimension: L8.00 m x W5.00 m x H11.00 m
 Weight: 60 ton

We transported several units of Technical Room and Building from the fabrication yard to the port for an export shipment in Port Klang. They were fabricated to be used in a gas development project East Malaysia. Among the items are:

Cargo: Technical Room
 Dimension: L23.2 m x W10.5 m x H5.5 m
 Weight: 51.10 ton

Cargo: Building
 Dimension: L15.0 m x W9.65 m x H5.72 m
 Weight: 33.24 ton

Transport of Tunnel Boring Machine (TBM)

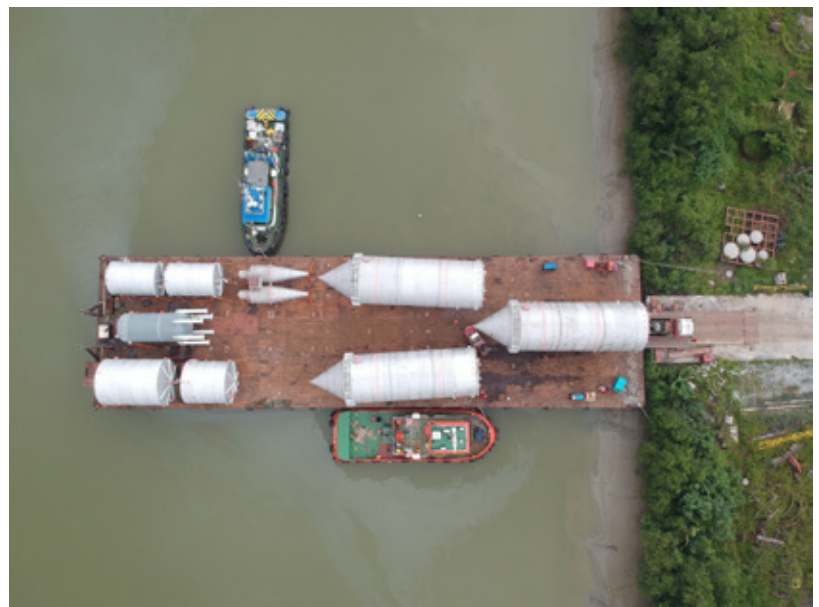

Another round of TBM shifting within Klang Valley by Megalift and this time, we completed 5 sets. There were series of transportations carrying different parts of the TBM including the heaviest front shield, middle shield, tailskin and all of its accessories.

Cargo: Front Shield
 Dimension: L6.8 m x W6.8 m x H4.6 m
 Weight: 170 ton each

Cargo: Product Silo
Dimension: L22.68 m x W7.12 m x H7.31 m
Weight: 42 ton

This export shipment comprised 60 items in total, out of which 9 was out-of-gauge and could not be transported on the road. We arranged for a barge, managed the RORO operation using our trailers before sending them to the port.

Among the items are storage tanks, cyclone and silos. Watch the RORO operation here: <https://www.youtube.com/watch?v=QwMsyHzaN-M>

Export of Crawler Cranes from Kuantan to East Malaysia via Port Klang - thanks to our team for the good coordination. Multiple trips of low loader as well as small trucks for the accessories from Kuantan to Port Klang before they're shipped to East Malaysia.
 Cargo: Crawler Cranes (2 units)
 Dimension: L10.60 m x W3.00 m x H3.35 m
 Weight: 32.6 ton (main body)

Lifting & Transport of Locomotives for Railway Project

Cargo: Locomotive
 Dimension: L15.12 m x W2.73 m x H3.41 m
 Weight: 80 ton

We have been handling the loading and unloading as well as the road transport of locomotives for a railway project undergoing construction. There are also 16 trips of wagon deliveries in the coming month, stay tuned in the next newsletter.
